

Healthcare Professionals needed

Are you a UK healthcare professional involved in postoperative feeding management for patients having flap surgery for head and neck cancer?

Please complete our quick survey which is aiming to map UK practice of how patients are transitioned from tube to oral feeding after undergoing flap surgery

Who can take part:

UK based adult healthcare professionals (e.g. Surgeons, Dietitians, Speech and Language Therapists, Nurses) who are involved in feeding management after flap surgery for oral cavity/oropharyngeal cancer
